THE SOUTHERN CALIFORNIA REGION

PROJECTS

Water Management

- Groundwater Grants & Loans
- Groundwater MOUs
- ▲ Water Use Efficiency Grants & Loans
- Interim Water Supply Grants

Ecosystem Restoration Grants & Watershed Management

- '97-'01 Approved Projects

HIGHLIGHTS:

1. Commerical Washing Machine Rebates
2. X-Ray Processor Retrofit Water Conservation
3. Friant Water Exchange
4. DRIP

REGIONAL ACCOMPLISHMENTS

- Signed agreements with five local water agencies to study ways to improve groundwater storage
- Provided nearly \$1.9 million for 14 water-use efficiency programs in urban areas
- Funded a desalination research and innovation partnership at Metropolitan Water District
- Funded over 20 groundwater loans and grants for recharge construction and storage pilot projects

Kern River

**SOUTHERN
CALIFORNIA REGION:**

- Inland Southern California is among the fastest growing regions in North America
- Southland water users conserve 480,000 acre-feet of water a year and produce 230,000 acre-feet of recycled water—reducing the demand for additional Bay-Delta water and meeting the needs of a growing population
- Dependable supplies of good quality water fuels Southland businesses, catapulting the state's economy among the world's top 10
